String & Scissors handicap method

Each player has been given an allotment of string based on his / her MTHI (1 foot of string for each stroke) instead of receiving a number of handicap strokes to make a net score. As the players work their way around the course, they may move their ball to improve their lie or escape trouble, but they must cut off the same amount of string. When there is no string left, then the player is on his/her own to the completion of the round. **The ball can be moved directly to the cup.**

Because a true gross score cannot be determined, the Strokes-on-a-Rope does not update a player's handicap index. Net birdies and net eagles are also not recorded for this event. FH, GiR, and Putts are still counted as usual.

**Do not allow the measuring and cutting of string to slow your group
Please dispose of used string properly**
